

KUMO® CP

KUMO CP is an optional 1RU control panel that can be used in standalone or networked configurations suitable for all KUMO routers except the KUMO 6464. For KUMO 6464 please see the KUMO CP2. Connecting via Ethernet to the same network as KUMO routers, KUMO CP enables full control from any location without the need for a computer. Up to four KUMO routers can be controlled from a single control panel. Supports ganged dual and quad port routing, allowing users to group together multiple inputs and outputs for Dual Link, 4K and Ultra HD workflows. In addition to SD and HD, every KUMO can route 2 or 4 grouped 3G-SDI connections, supporting uncompressed or RAW 4K and UltraHD signals.
