Rotational speed	670 RPM

### KEY FEATURES

#### ■ HIGH IMPACT

High-definition 3D visuals with a holographic effect created by HYPERVSN™ make a big impression and evoke a fascination amongst visitors. HYPERVSN™ devices can also be installed together and synchronized to form impressive and striking images.

#### ■ LIGHTWEIGHT AND ENERGY-EFFICIENT

HYPERVSN™ devices are lightweight, energy-friendly and easy to maintain. Sound-enabled HYPERVSN™ units can be connected wirelessly and managed remotely from one location.

#### ■ COMPREHENSIVE MEDIA PLANNING

HYPERVSN™ web-based platform supports the most common video formats and enables users to transform existing 2D content into 3D content forms. You can also use video from the content library or upload original content, as well as view analytics.

#### ■ SCALABLE

HYPERVSN™ supports a multiple device built-out network (1-1000 units and more) to guarantee that you reach the needed impact in the required number of locations. It can also be installed horizontally or vertically to suit your space across an area of up to three metres.
