

# STAGEJACK

4Wall's Stagejack is an ultra-light weight indoor, large video screen solution for live events. At just 46 lbs per square meter (66 lbs per unit), it is the lightest product on the market with this high of a resolution. Its slim depth makes it ideal for theater use and flying between tight line set spacing. Because it 1.2m square, it assemble two to four times faster than any comparable products on the market.
